Call for Papers. PACT is a long-running and unique conference at the intersection of classical parallel architectures and compilers that brings together researchers from architecture, compilers, programming languages, and applications to present and discuss their latest research results.

PACT19

ISO/IEC/IEEE 42010, Systems and software engineering — Architecture description, is the international standard for best practices in the description of the architectures of systems, where systems range from software applications to enterprises to systems of systems.

ISO/IEC 42010:2007 / IEEE-Std 1471-2000 - ISO/IEC/IEEE 42010

The 802.11b standard has a maximum raw data rate of 11 Mbit/s, and uses the same media access method defined in the original standard. 802.11b products appeared on the market in early 2000, since 802.11b is a direct extension of the modulation technique defined in the original standard.

IEEE 802.11 - Wikipedia

1. Multidimensional Analysis The study of "dimensioned quantities," such as 1 volt, and 2 meters, and their possible interrelationships, forms an interesting branch of applied mathematics (or physics or engineering) called dimensional analysis.

Free Haven's Selected Papers in Anonymity

Vehicular ad-hoc networks (VANETs) are created by applying the principles of mobile ad hoc networks (MANETs) – the spontaneous creation of a wireless network for vehicle-to-vehicle (V2V) data exchange – to the domain of vehicles. VANETs were first mentioned and introduced in 2001 under "car-to-car ad-hoc mobile communication and networking ...

1. Introduction. Software engineering is a continuously growing research field derived from computer science since the 1960s. Correspondently, the importance of software engineering has been widely recognized by more and more scholars all over the world in the past five decades.

A bibliometric assessment of software engineering scholars

The term "Internet-of-Things" is used as an umbrella keyword for covering various aspects related to the extension of the Internet and the Web into the physical realm, by means of the widespread deployment of spatially distributed devices with embedded identification, sensing and/or actuation capabilities.

Internet of things: Vision, applications and research
