In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. The term aqueous solution is when one of the solvents is water. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent.

Solution - Wikipedia

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.

Chemistry - Wikipedia

This step by step guide shows students how to make a standard solution of NaOH and encourages them to think about the importance of each practical step.

Abstract. The lack of stability is a challenge for most heterogeneous catalysts. During operations, the agglomeration of particles may block the active sites of the catalyst, which is believed to contribute to its instability.

Titanium Dioxide as a Catalyst Support in Heterogeneous

A symposium entitled Creating a Common Language for Chemistry: IUPAC's Role - Past, Present, and Future, will be held during the 2019 spring National Meeting of the American Chemical Society (ACS) that is scheduled to take place in Orlando, FL (USA) during the week of March 31, 2019.
